

Makun Adebola Elisha

Software Developer

JAVASCRIPT – TYPESCRIPT – PYTHON – SOLIDITY

Portfolio: <https://portfolioadebola.netlify.app>

Github: <https://github.com/Garvey17>

Result driven Full-stack developer with 4+ years of experience building scalable applications on both web and native platforms. Skilled in MERN stack, Next.js, TypeScript, PostgreSQL (Supabase/Prisma), Docker, and modern cloud infrastructure with AI integration. Passionate about delivering clean, performant, and user-focused digital experiences while continuously exploring new technologies.

PROFESSIONAL EXPERIENCE

Full-stack software developer(Freelance)

June 2023 - Present

Remote (Via Upwork)

- Designed and built a robust enterprise web application using MERN stack + Next.js, delivering measurable improvements in data quality, performance, and governance for global clients.
- Developed scalable backend solutions with PostgreSQL, Supabase, Prisma, and modern API architecture to support metadata management, taxonomy systems, and policy enforcement.
- Collaborated closely with designers, fellow engineers, and stakeholders to translate business requirements into clean, maintainable, and high-performance codebases.
- Owned end-to-end development lifecycle — from architecture and implementation to deployment (Docker and Cloud) and ongoing optimization — consistently delivering projects on time and within budget.

Full-stack development intern

Oct 2025 - Jan 2026

AF RAF GROUP

- Developed a B2B/B2C web platform using MERN stack & Next.js, enabling customers to place orders, track deliveries, and manage accounts.
- Built an internal staff portal for managing operations, including order processing, inventory updates, and delivery scheduling.
- Implemented authentication, role-based access, responsive UI, and PostgreSQL backend (via Prisma).
- Deployed solutions using Vercel and contributed to faster, digital-first customer & operational workflows.

RECENT PROJECTS

AXEON - Online Coding Playground

August 2025

- Created Axeon, a fast browser-based coding environment similar to StackBlitz
- Built with Next.js (JavaScript) + Monaco Editor (VS Code's editor)
- Features: instant preloaded project templates (React, Next.js, Node, etc.), multi-file support, live preview & hot-reloading
- Integrated local AI coding assistant powered by Ollama (code suggestions, explanations, generation, refactoring)
- Designed clean, responsive UI with Tailwind CSS + shadcn/ui
- Deployed on Vercel with optimized performance

Tech Stack: Next.js · JavaScript · Monaco Editor · Ollama (local LLMs) · Tailwind CSS · shadcn/ui · Vercel

AF RAFF – B2B Cement Distribution Portal (Internship project)

December 2025

- Designed and developed AF RAFF, a modern B2B web portal for a leading cement distributor and contractor using Next.js 14 (App Router) + Supabase (PostgreSQL + Auth).
- Implemented secure user authentication (Supabase Auth), role-based access, real-time order tracking, instant price quotation, bulk order placement, invoice history, delivery scheduling, and credit limit monitoring.
- Built a fast, responsive, mobile-friendly interface with Tailwind CSS optimized for construction professionals and field teams.
- Leveraged Supabase real-time subscriptions for live order updates and integrated efficient data handling with Prisma ORM.
- Delivered a production-ready platform that streamlined ordering workflows, reduced manual processing time, and improved client experience.

Tech Stack: Next.js · JavaScript · Tailwind CSS · Supabase (Auth & Database) · Prisma ORM · Vercel (Deployment)
